A software development partner committed to your success

Founded in 2002, Infosit is a one-stop **software development company** building cutting-edge solutions for result-driven organisations.

Our dedicated team of designers, developers, and project managers at our technological hub in Croatia — leverage the latest technologies and agile methodologies to deliver flexible, and robust digital products for our clients in several countries.

We are the crew behind software that powers some of the leading hospitality systems in the Adriatic.

A word from our CEO

In today's fast-evolving world, AI is reshaping industries at an unprecedented pace. Businesses must stay agile, adapting to new tools and innovations while ensuring efficiency and sustainability.

At Infosit, we take a pragmatic approach to technology. We focus on finding the best tools and solutions for the business challenges we solve, rather than following trends for the sake of innovation. By continuously monitoring emerging technologies, we integrate the most effective ones into our processes—whether it's AI-powered solutions that enhance decision-making or smart integrations that streamline operations. Our goal is to use technology as an enabler of growth, efficiency, and long-term success.

OUR SERVICES

Discovery, Strategy & Design

Laying the Foundation for Success

Our Discovery and Strategy phase ensures your project is built on a solid foundation. By conducting thorough audits and understanding your product, users, and goals, we eliminate uncertainty and set your project up for success.

Strategic Roadmapping

We prioritize essential elements and plan for future evolutions. This structured approach enables us to deliver accurate project estimates, minimize risks, and ensure alignment with a clear and actionable roadmap.

User-Centric Insights

We leverage data analytics and metrics to gain deep insights into user behavior. By analyzing engagement and conversion rates, we continuously refine and optimize the user experience, ensuring our designs are both intuitive and effective.

Innovative Design Solutions

Our expert team combines creativity and technical know-how to deliver stunning designs that drive results. Whether it’s a website, mobile app, or branding overhaul, we turn your challenges into success stories.

OUR SERVICES

Bespoke software development

Driving Business Growth and Empowering Users

We collaborate closely with you to understand your unique needs and develop fast, attractive, and robust digital solutions. Our goal is to enable your business, empower your users, and enhance customer engagement by delivering outstanding user experiences.

Custom Solutions for Unique Needs

Our bespoke software development services are tailored to meet the specific demands of your business. Whether you need high-impact web applications or mobile apps, we ensure our solutions are optimized for efficiency and market reach.

Innovative and User-Friendly Interfaces

We focus on creating simple, elegant, and intuitive user interfaces that enhance the user experience, intensify engagement, and boost productivity.

Flexible and Scalable Software

Our custom software is engineered for flexibility, scalability, performance, and security. We automate and support your business model, ensuring our solutions grow with your business and adapt to changing needs.

OUR SERVICES

API integration

Maximize efficiency and realize the full potential of your data

We connect software solutions for different purposes sharing data from one to another through an API. Our API development team automates processes with **enterprise-wide** application integration. We create interfaces to connect your **on-premises** systems and/or those systems to **cloud-based** applications.

Examples of integrating modules:

» Booking services - booking.com, Sabre, Phobs

» TripAdvisor, TrustYou

» YouTube, Google Maps

» Payment gateways

» Customer Relationship Management (CRM) Application Integrations

Integrating your website into your internal business software, CRM, accountancy product or warehouse management system provides **powerful automation**, saving time and money. We integrate to leading brands such as **Microsoft Dynamics** and **SALESmanago**.

OUR SERVICES

Website development

Increase brand awareness and shared values

Understanding your strategic needs and requirements, including timeline and costs, is paramount to the creation and maintenance of a successful website.

Intuitive user experience

Creating vibrant, imaginative, and engaging user experiences, beautiful websites with fast and intuitive user interfaces keep visitors coming back for more.

Content-driven

Leveraging the power of data-driven analytics, content-driven experiences increase engagement, reduce bounce rates, and generate a powerful bond between consumer and brand.

Scalable

Irrespective of your company's size or maturity, we'll build a scalable website that evolves with your business and ensures a high return on investment.

OUR SERVICES

Mobile apps development

Accelerate app adoption and increase client engagement

You need a mobile application to build your business … Let's keep it simple but adaptable and expandable. Choose Android, IOS or both platforms. Real-time connection, payment gateways, cloud storage, training and support to make it happen. Our mobile app development team includes experienced business analysts and developers.

Multiplatform

Ensure a consistent user experience and smooth transition between Android and iOS. We'll help you choose the right native, hybrid, or cross-platform framework for your app.

User-centric

Accelerate user onboarding and return on investment with user-friendly apps offering sleek, elegant, and intuitive interfaces that meet expectations.

Optimized and secure

Engineered for security and optimized for maintainability, fast, robust, and scalable apps allow you to seamlessly add new features and functions to retain your competitive edge.

OUR SERVICES

Ongoing partner support

We are with you all the way!

We consistently foster long-term relationships with our customers, and we take particular pride in growing together. After a project is successfully finished, there is nothing better than a satisfied customer who wants to continue working with us.

Live communication with clients, proactive updating releases, modifications to meet client's changing needs assures to continuous customer satisfaction.

HOSPITALITY

Unlock the potential of your hospitality business

- Boost direct bookings and revenue
- Cut down operational costs and streamline processes
- Enhance efficiency and customer experiences
- Maximize your brand value and digital presence

As your central platform, **Infosit DXP** offers outstanding flexibility to adapt to your specific business needs and it fully supports you direct marketing and sales goals.

Backed by **20+ years of experience** and expert support teams, our platform is the driving force behind the direct sales and marketing strategies of leading hospitality companies in the Adriatic.

Drive profit growth from direct bookings on your website with Infosit DXP

HOSPITALITY

When to turn to us for solutions?

1. You need to improve operational efficiency.
2. You need to boost direct bookings.
3. You want to replace an existing IT system with a different one.
4. You need a central content management system for streamlined editing across channels and devices.
5. You need a highly configurable platform for extra capability.
6. You need seamless API-level solutions and connections.
7. You need a scalable solution that fully supports your business growth.

HOSPITALITY

Why choose us as your niche partner?

- We understand that your goal isn't just digitalization, but achieving business results.
- We have deep knowledge of hospitality, its operations, requirements, and logic.
- We support you and your team every step of the way – we've got your back.
- We stay focused on your business needs.
- We deliver on time, within budget, and in scope.
